PROJECTS

Residential HVAC System Design and Cooling Load Analysis for a 2-Bedroom House

- Performed room-wise cooling load estimation using Manual J principles and standard residential design assumptions.
- Selected suitable HVAC equipment capacities and studied ducted and ductless system configurations.
- Developed basic supply and return airflow layouts and explored zoning concepts.
- Organized design assumptions, load calculations, and equipment schedules using Excel.

3D CAD Modeling of ABB Industrial Robot

- Created a complete 3D model of an ABB industrial robot using SolidWorks.
- Modeled robot links and assemblies with proper geometric constraints.
- Generated engineering drawings and assembly configurations.
- Improved proficiency in CAD modeling, assembly design, and technical documentation.

SKILLS

HVAC Concepts	Manual J Basics, Cooling Load Estimation, Airflow and Zoning Concepts
Software	SolidWorks, AutoCAD, Excel, ANSYS, MATLAB
Engineering	Technical Documentation, Equipment Selection, CAD Modeling, Engineering Drawings
Soft Skills	Communication, Teamwork, Problem Solving, Attention to Detail, Time Management

EDUCATION

Bachelor of Technology in Mechanical Engineering

Expected 2027

National Institute of Technology Srinagar

Current Final Year Student

CGPA: 8.0

EXPERIENCE

Sponsorship Team Member, Rang-e-Chinar 2024

2024

- Coordinated with sponsors and external stakeholders for the annual cultural fest.
- Assisted in communication and event management activities.

Sponsorship Team Member, Techvaganza 2025

2025

- Collaborated with the organizing team to support sponsorship activities.
- Contributed to professional communication and coordination with partners.
